2. Determination of Use of New Drugs in the ESPAD survey 2011

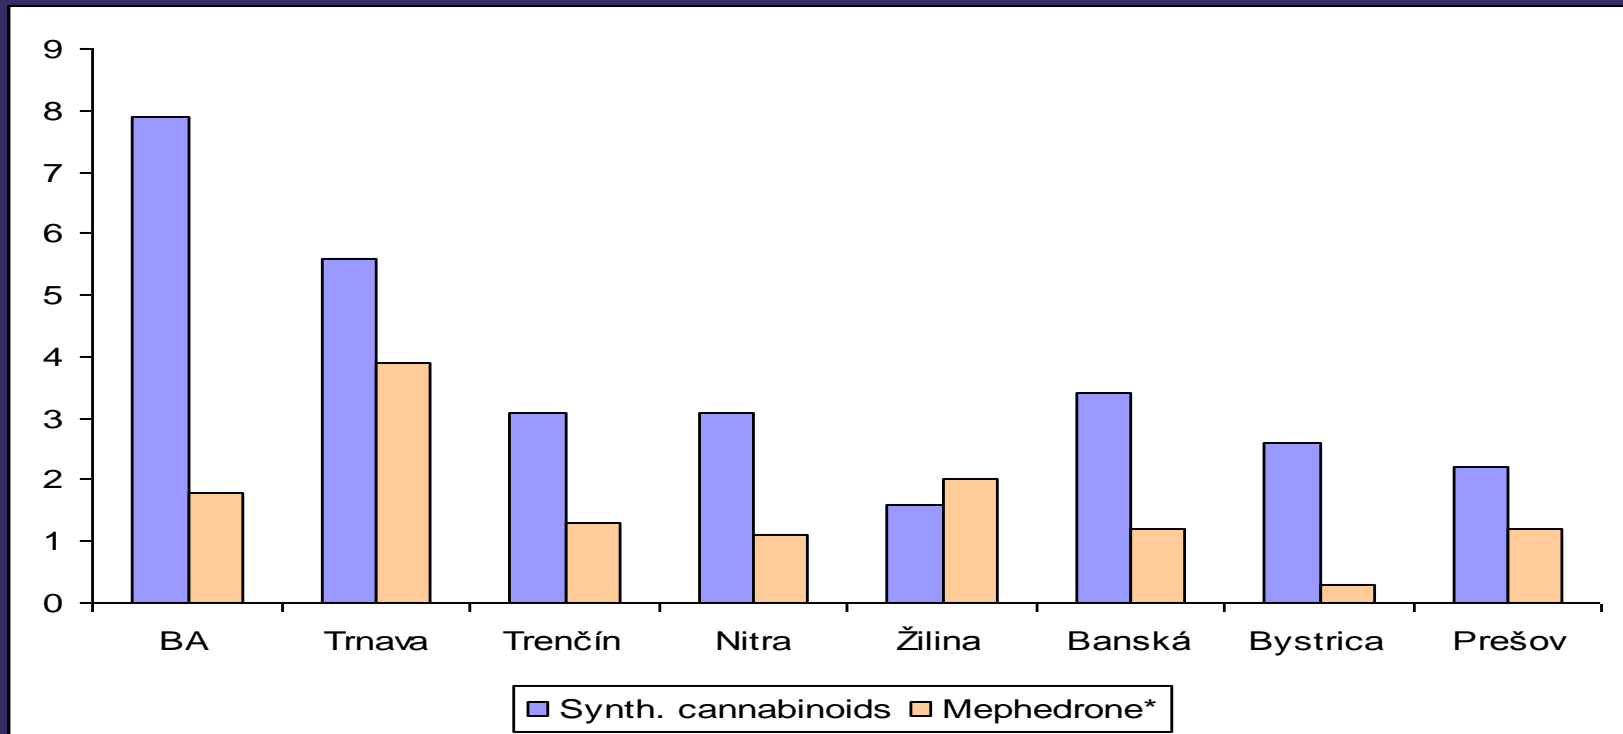

Other attempts to estimate the use of new substances in Slovakia include also the determination of use of synthetic cannabinoids and mephedrone in the fifth cycle of the school survey ESPAD in Slovakia.

In April of this year, 15 to 19 years old respondents were asked about their experience with products of Crazy shops containing synthetic cannabinoids and mephedrone. The questionnaire also stated trade names of products such as Spice gold, Spice silver, Rýchly (Quick) Lopéz, Tvrdý Míša and so on.

It should be reminded, that in April 2011 the amendment of the Act No. 139/1998 of the National Council of the Slovak Republic 998 Coll. on Narcotic Substances, Psychotropic Substances and Preparations as amended has already been in force, which completed annexes (especially annex 1) of the Act by 38 psychotropic substances including **mephedrone and synthetic cannabinoids**.
